

Agenda for meeting 4

Location: DW IZ-1
Datum: 7-3-2023
Time: 14:45 – 15:30
Attendees: Danny Bunschoten, Emīls Dzintars, Aadesh Ramai, Sergiu-Nicolae Stancu, Konstantin Teplykh
Chairman: Aadesh Ramai
Minute-taker: Sergiu-Nicolae Stancu

Agenda-items

Opening by chair

No minutes.

Check-in

No minutes.

Announcements

Meaningful MR deadline is on this Friday
Buddy check on Friday too, but should not take a long time to complete.
Exactly 1 month to finish the product.

Approval of the agenda

No minutes.

Approval minutes

Everyone is up to date with the minutes.

Meaningful MR – Danny, Yuraj, Emils and Aadesh have a meaningful MR.
Sergiu and Konstanin do not feel like they have one yet.

Class structure

The board class can be improved.
Remove the MainUIControl class.
We have to keep the TestBoardRepository class.
Not all the methods in the TestBoardRepository class need a body.
Use EqualsBuilder instead of generated equals and also HashBuilder where possible.

Merge the board branch after the meeting to avoid pipeline failure because of the checkstyle.
Use gradlew build to check if the pipeline will pass.
-Do the database schema in TDList, Card, Board classes.
-Aadesh will add tests to TDList class.
-Add more than one test to match the cyclomatic complexity
-No need to add more tables in the database for the basic requirements.

UI

It is possible to select an item and delete it by id in Scene Builder.

We can have a pop-up to remove cards when we click on them.

-Discuss about the UI after the meeting to decide how are we going to remove a card.

-We can deal with the multiple lists by having an horizontal scroll, or using something similar to flexbox for fewer lists.

We should separate the showCard and addCard classes because they use the same scene for the moment.

Logic –

Synchronisation is good for the moment, thanks to Konstantin.

Issue: add an issue for TDLIST UI.

Konstantin: add issues in gitlab to have an easier time dividing the tasks.

Divide tasks

Sergiu – add the database schema

Danny - Improve Yuraj's code in the main branch

Adding a list functionality : Konstantin and Emils

Aadesh: remove card button

Everyone will work on its own branch and push, so two people won't work on the same branch at the same time

Add issues and milestones on gitlab.

Deadlines

Deadlines will remain on Thursday night

Add smaller commits and do not have many commits in the same merge request.

Show TA our product

We are on track for the moment.

Feedback round

No minutes.

Question round

Do more frequent commits.

Closure

No minutes.
