# Agenda Week 7 Minutes

## Agenda

| | |
|---|---|
| Location: | [DW IZ3] |
| Datum: | [28-03-2023] |
| Time: | [14:45 – 15:30] |
| Attendees: | [Danny Bunschoten, Emils Dzintars, Aadesh Ramai, Sergiu -Nicolae Stancu, Konstantin Teplykh, Yuraj Mangalgi] |
| Chairman: | Danny Bunschoten |
| Minute Taker: | Yuraj Mangalgi |

## Agenda-items

[14:45 – 14:46]     **Opening by chair**

[14:46 - 14:48 ]     **Check-in**
Heuristic grade is 6
Some things we need to improve
Don't need an appendix, part of the grading
We still did good job

[14:48 – 14:49]     **Announcements – [Informing]**
Deadline this Friday a draft, what do we want as a draft, video, mood board?

[14:49 – 14:50]     **Approval of the agenda –** [Discussion]
No additions to the agenda

[14:50-14:51]     **Approval minutes – [Discussion]**
All members have read the minutes

- We improved a lot than what we expected, meeting all the basic requirements
- there was however one issue, about disconnecting the client. Do we need to have a disconnect to the server?
- It was resolved that we do need to disconnect to the server but not through closing the application
- Another point: We should take better care of the clients
- for example someone delete a list they wont know if another is adding a card to that list

**TUDelft**

- Issue resolved by having a prompt letting users know someone is editing that particular list
- We should improve on the usability of the product
- The current implementation it is not possible to remove a board, therefore we should create an issue for that

How Should we Divide the Advanced requirements? And when should the Deadline be finished

- if we are working in groups it should go more smoothly and be quicker to implement
    o Splitting one group into 2 making the multi board: Konstantin, Sergiu
    o Splitting one group into 2 making the Card Details: Yuraj, Aadesh
    o Splitting one group to work on the Basic requirements and finish polishing: Danny, Emils
- Important to note that we work in priority for the advanced features as if we don't then this can negatively affect our grade.
- There are small polishing things we need to consider for the basic requirements, therefore Danny and Emils will be working on it
- The deadline for the advanced features and the basic polishing should be done by Thursday night

Technology feed back
    o Point was made to the TA whether we need web sockets and longpolling
    o The answer is we need both websockets and long polling, needs to have a clear working example of both technologies for our technology
    o There was feedback we didn't use app controller and used only rest controller, we need to demonstrate to be able to work with different annotations

Sergiu usernames

    o At the end usernames are not needed
    o Instead a possible solution is to give each client a number and then the client knows which number it needs and can disconnect from the server

**[15:05-15:20]**          **[Draft product pitch] – [Discussion]**

- Deadline by Friday is the Product pitch video
- The advanced features should be done on Thursday and working on a zoom call we can record the product pitch
- There needs to be space reserved on the video for possible future advanced features we make

  1.5 minutes for the multi board
  1.5 minutes for the tags
  1 minute for the card details
  5 minutes for the basic features
  And 1 minute extra time for other advanced features if it will be implemented

**[15:20 – 15:23]**          **[Present our Application] – [Reflection]**
- The product is on track

**[15:26-15:28]**          **Feedback round – [Reflection]**
- meeting went well and settled on issues, we improved a lot. Code distribution wasn't as clear.

**[15:28-15:29]**          **Question round – [Reflection]**
- Next meeting there are agendas and a minute taker, asking primarily questions
- 10 days left before the coding deadline
- Important to explain all the implementation
- the code contribution between the members
- Meeting will be shorter from 2:15 to 2:40
- All issues need time estimate and a milestone

**[15:29-15:30]**          **Closure**
